⁹The correction to U_d due to the long-range Coulomb interactions set by the charge outside $R = 7.4$ a.u. estimated perturbationally to be smaller than 0.1-0.2 eV, indicating that R^* is small. Further, Fig. 2b illustrates the correction needed to transform the one-electron energies of Fig. 1 to ionization energies. Using the

The correction is seen to be small (0.1 eV).
