## ANNOUNCEMENTS

### CATSLife FAQs

#### What tests are run on the blood samples?

Tests include routine health-related components such as total cholesterol and HDL cholesterol. We are also testing for less well-known factors (e.g., leptin, ghrelin, and growth hormone releasing factor), and we are preparing for genotyping.

#### How long will it take to receive my blood test results?

We do not provide individual results as the primary purpose of the study is to increase scientific knowledge. The samples are not processed for many months so the results would not represent your current cholesterol levels. For example, we
